

Seeking Participants for Research Study on AI for Spanish-Speaking Patient Care

Hello!

We are a team of researchers at [affiliation] conducting an academic study to understand the experiences of Spanish-speaking patients when navigating medical care, and if/how AI tools could support them in this process.

We are seeking participant volunteers who **have direct experience supporting Spanish-speaking patients** and can share insights on communication or cultural barriers, and what current technologies look like. Participants include, but are not limited to, patient advocates, interpreters, and clinicians.

Participation would involve a **1-hour remote interview** with a researcher in the study. To thank you for your time and effort, we will provide a \$20 gift card.

In order to participate:

- You must be 18 years old or older.
- You must be able to participate in the interview in English.
- You must have experience working with Spanish-speaking patients.

If you are interested in participating in this study, please fill out this interest form here: [link]

Please contact [researcher name & email] if you have any questions or concerns about the study.

Thank you!
